

## Research an Invertebrate

In science we have been finding out how living things are classified.

We found out that animals are grouped as being vertebrates (have a back-bone/spine) or invertebrates (do not have a back-bone/spine).

Please research invertebrates. You could find out what type of invertebrate it is, where it lives, how long it lives for, its life cycle. The more invertebrates you research the better – five would be great.

Barnacle

Bee

Butterfly

Octopus

Woodlouse

Crab

Lobster

Snail

Centipede
