

Monday 2nd March 2026

Dear Parents and Carers,

We are delighted to let you know that next week we will be celebrating Science Week across the school!

This year's theme is "Curiosity", and we will be encouraging all of our children to ask questions, explore ideas, and think like scientists. Throughout the week, each class will take part in a range of exciting hands-on investigations and activities designed to spark imagination and develop scientific thinking.

One of our whole-school highlights will be a collaborative Bubble Experiment, where every year group will explore the science behind bubbles — investigating shapes, surface tension, colours, and even attempting to create some giant bubbles! We are very much looking forward to seeing the playground filled with curiosity and discovery.

In addition to our classroom activities, we would love to involve members of our school community. If you work in a scientific field — including healthcare, engineering, research, technology, environmental science, or any other science-related profession — and would be willing to come into school to speak to the children about your career, please let us know. Hearing first-hand about real scientific roles can be incredibly inspiring for our children.

If you are interested in supporting us in this way, please contact the school office by the end of the week.

Thank you for your continued support. We are very excited about the week ahead and look forward to sharing some of our discoveries with you.

Kind Regards

Mr S Bryant
